

A GUIDE TO THE AMATEUR PHOTOGRAPHER

How to shoot for glamour

YOUR MODEL

Keep in mind there is no perfect beauty, learn to conceal the worst, bring out the best, and still have something to the imagination.

A definition of glamour, the revelation of a magic moment when a woman is at her most beautiful and when her personality is vital.

The glamour picture should have a certain mood of privacy, through the keyhole quality. The subject is somehow unaware of the camera although she may very well be.

Your backgrounds, you can not go wrong using a simple background. The included background also lends itself well to news paper and other reproductions.

YOUR CAMERA

The average amateur believes that the secret of good photos lie in expensive equipment. You are wrong. Most were made with the same camera and other equipment as used by the average amateur.

The pictures in this book were made with 4-5 speed apollo camera. Two studio lights were used. One on the camera and one for a back light. Tri x film was used and shot at F 16.

A FINAL WORD

Keep taking pictures out of 100 pictures 99 may be terrible, one excellent. From the excellent one you will learn how to improve your work tomorrow.
